The T4T - Tools4Teaching in Digital Education

Settings project focuses on supporting adult educators and formal, non-formal and informal education providers to effectively transition to digital education and provide the same level of interaction and 'human-like' experience for learners as in the physical environment. The overall aim is to strengthen the capacity of adult educators and training professionals to build and maintain effective group dynamics in digital education environments to better engage their online learners.

International webinars

We are pleased to announce the success of our international webinar series in May and June. In these two months, we hosted six webinars on various topics such as online language teaching, entrepreneurship, creative teaching methods and more:

- "Keep students engaged during an online language class"
- "Gathering your ideas! Being an entrepreneur & the Boss"
- "Engaging students while teaching environmental topics"
- "Using artistic & creative activities for online teaching creativity"
- "Practical exercises for People with Disabilities"
- "Keep Your students active during online ICT training"

With over 180 participants, including teachers, adult educators and NGO representatives, our webinars exceeded expectations. Participants praised the sessions for enhancing their virtual teaching skills and providing valuable insights into practical digital tools. The positive feedback has fuelled interest in our project. Participants have expressed a desire to be kept informed about the further implementation of the project.

Did you miss the webinars? No need to worry! You can access the recorded sessions on our project website:

DIGITAL TEACHING COMMUNITY

THIRD TRANSNATIONAL PARTNER MEETING IN LODZ, POLAND

At our recent hybrid meeting, hosted by the University of Social Sciences in Lodz, Poland, partners focused on improving online group dynamics in adult education. Key topics included project progress, upcoming activities and in-depth discussions on the implementation phases.
